User Personas

PERSONA

Rahul, The Indecisive Streamer

ABOUT

Rahul, 28, is a marketing executive based in Lucknow who enjoys watching movies and web series after work. He subscribes to multiple OTT platforms like Netflix, Prime Video, and JioHotstar, but often spends more time deciding what to watch than actually watching. He looks for an entertainment platform that makes content discovery faster and more personalized instead of forcing him to browse across multiple apps.

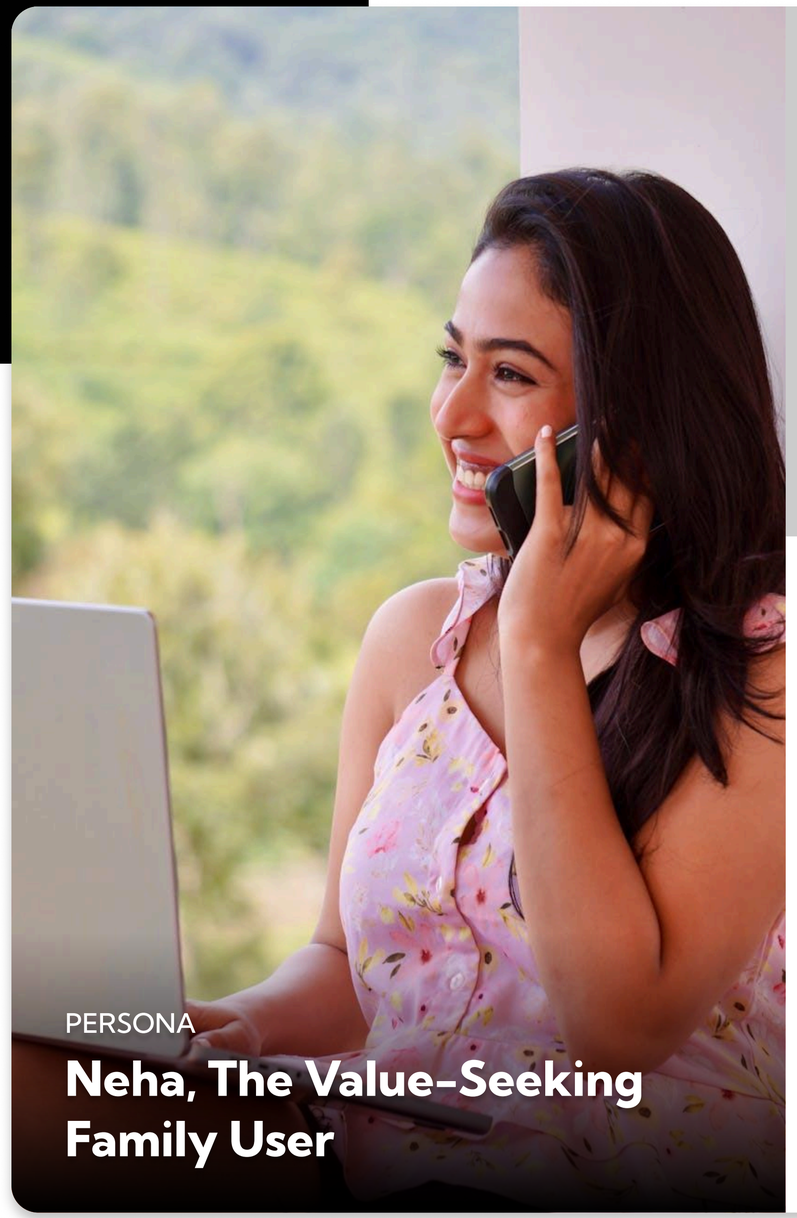

AGE	28
OCCUPATION	Marketing Executive
LOCATION	Lucknow

PAINS

- Spends more time browsing than actually watching content.
- Finds it difficult to decide what to watch due to an overwhelming number of choices.
- Struggles to identify which OTT platform hosts a specific movie or show.
- Gets frustrated by repetitive and irrelevant content recommendations.
- Often abandons the app when content discovery takes too long.

GOALS

Rahul wants a personalized entertainment experience that helps him discover relevant content quickly across multiple OTT platforms. He values intelligent recommendations, seamless search, and curated collections that reduce decision fatigue and help him spend more time watching than searching.

PERSONA

Neha, The Value-Seeking Family User

ABOUT

Neha, 35, is a school teacher from Jaipur who manages entertainment subscriptions for her family. Different family members use different streaming platforms, making it difficult to keep track of subscriptions and find content everyone enjoys. She is always looking for a simpler and more affordable way to manage her family's entertainment.

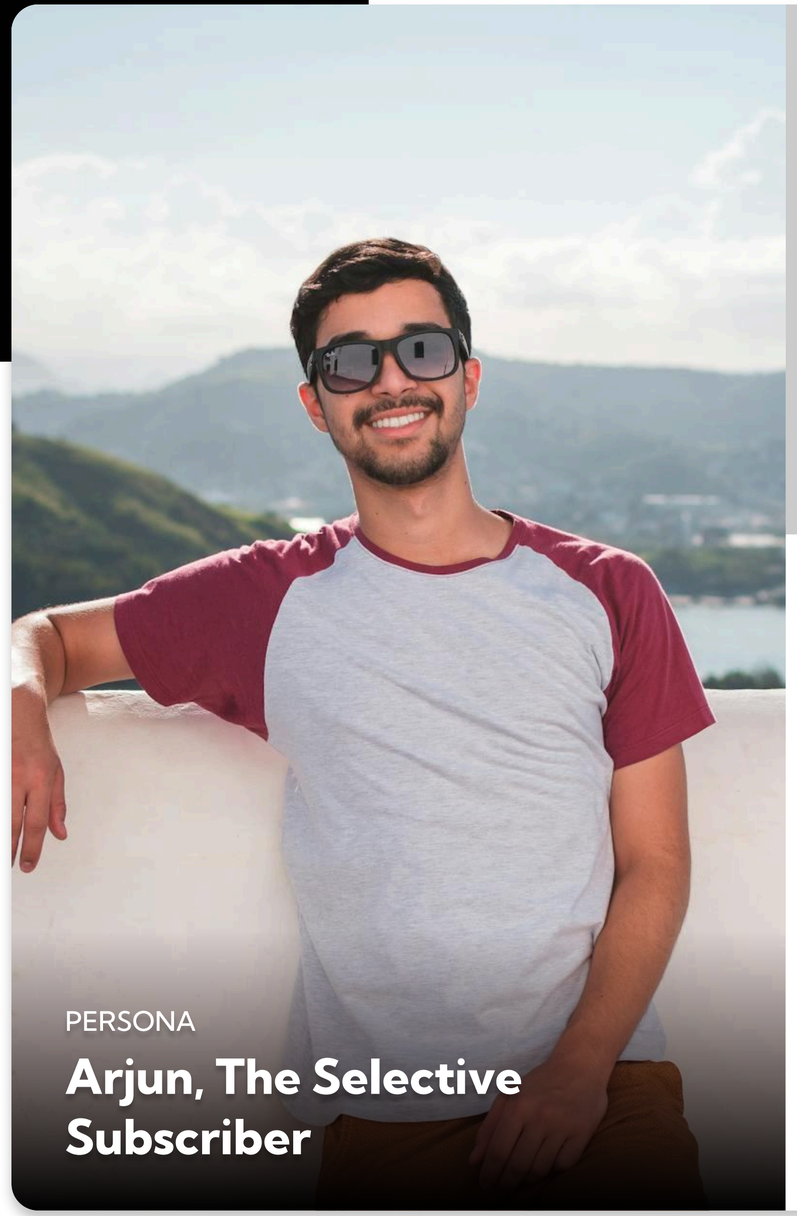

AGE	35
OCCUPATION	Teached
LOCATION	Pune

PAINS

- Finds it expensive to maintain multiple OTT subscriptions for different content.
- Struggles to find content that caters to the diverse preferences of her family.
- Gets overwhelmed by switching between multiple OTT platforms and interfaces.
- Finds it difficult to keep track of where different movies and shows are available.
- Spends unnecessary time searching for family-friendly entertainment.

GOALS

Neha wants a single entertainment solution that simplifies content discovery for the entire family while reducing subscription complexity. She values convenience, affordability, and an experience that helps everyone find something they enjoy without jumping between multiple apps.

PERSONA

Arjun, The Selective Subscriber

ABOUT

Arjun, 24, is an MBA student who primarily subscribes to OTT platforms when there's a specific event or release he wants to watch, such as the FIFA WC, Formula 1, or a highly anticipated cricket series. Rather than maintaining multiple year-round subscriptions, he prefers paying only when content interests him. He is always looking for a more flexible and cost-effective way to access premium entertainment without overspending.

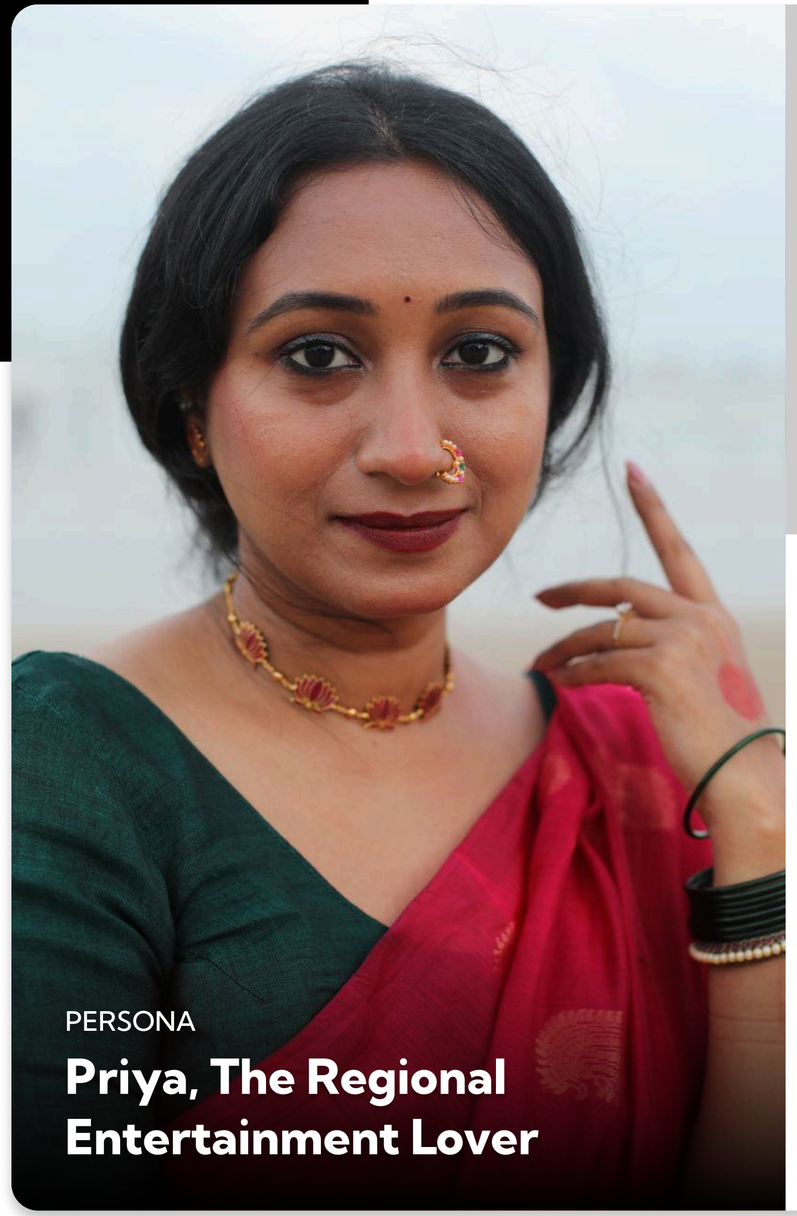

AGE	24
OCCUPATION	Student
LOCATION	Mumbai

PAINS

- Prefers paying for OTT subscriptions only when there's something worth watching.
- Ends up spending more by purchasing multiple short-term subscriptions across different platforms.
- Finds it frustrating to manage separate subscriptions for different events and exclusive releases.
- Loses track of active subscriptions and renewal dates after an event ends.
- Feels he pays for an entire month's subscription despite watching content for only a few days.

GOALS

Arjun wants a flexible entertainment solution that gives him access to the content he cares about without committing to multiple long-term subscriptions. He values affordability, convenience, and the ability to enjoy exclusive releases and live events without worrying about managing multiple OTT memberships or paying more than necessary.

PERSONA

Priya, The Regional Entertainment Lover

ABOUT

Priya, 31, is a housewife from Kolkata who enjoys watching Assamese, Bengali, and Hindi content with her family. Although she uses popular streaming services, she often feels regional content receives far less visibility than mainstream titles. She looks for a platform that recognizes her language preferences and makes discovering regional entertainment effortless.

AGE	31
OCCUPATION	Housewife
LOCATION	Kolkata

PAINS

- Finds regional content difficult to discover among mainstream recommendations.
- Gets irrelevant recommendations that don't reflect her language preferences.
- Struggles to find newly released regional movies and TV shows.
- Has to pay for multiple OTT services to get access to regional and mainstream content.
- Feels the platform prioritizes national content over regional entertainment.

GOALS

Priya wants an entertainment platform that prioritizes content based on her language preferences rather than popularity alone. She values localized recommendations, dedicated regional collections, and an experience that makes discovering regional content quick and effortless.

PERSONA

Ramesh, The Simplicity Seeker

ABOUT

Ramesh, 56, owns a grocery store in Nagpur and enjoys watching news, devotional programs, sports, and classic movies during his free time. While he occasionally watches content on his mobile, he still prefers familiar viewing habits and doesn't actively subscribe to multiple OTT platforms. He isn't particularly tech-savvy and values experiences that are simple, intuitive, and require minimal effort to navigate.

AGE	56
OCCUPATION	Shop Owner
LOCATION	Nagpur

PAINS

- Finds modern OTT platforms cluttered with too many features and content choices.
- Struggles to navigate interfaces that require multiple steps to access content.
- Gets confused by unfamiliar OTT terminology and complex navigation patterns.
- Finds it difficult to discover content that matches his everyday viewing interests.
- Relies on others to help set up or troubleshoot streaming services when something goes wrong.

GOALS

Ramesh wants an entertainment experience that feels familiar and effortless, helping him quickly access content that matches his interests without navigating through unnecessary complexity. He values clear navigation, relevant recommendations, and an interface that is easy to understand, regardless of the device he is using.

Thank you!

Your time and attention are truly appreciated. Looking forward to aligning design efforts for impactful, user-centered solutions.
